area. (3) The problem of retaliation is quite easy, and retaliation will succeed if a quite modest force survives the first blow. (4) For these reasons, the certainty that a modest retaliatory force may survive the first blow is a certain deterrent of nuclear aggression.

THE insurance of the survival of such a retaliatory force involves the constant development of radar and other detecting apparatus, and of missiles to overcome the detectors, thus involving both sides in moormous rising investments in nuclear powering order to prevent the use of that power. However, according to Mr. Alsop, the Russians are already building radar equipment superior to that of the American DEW-time, and are producing an anti-aircraft missile with

Therefore, we and our ailies are not going to begin a nuclear war simply because we are dispisased by Soviet pressure tactics in the Middle East, or because the Chinese Communists have suddenly seized the island of Quemoy." This gives the Soviets a new freedom of action with conventional weapons.

TO illustrate his point, Mr. Alsop chooses the Middle East as his example. He begins with the alleged secret Boviet promise to support the Arab drive to impose on us the so-called "1987 Partitlon Plan Frontiers." Fully understanding the meaning of the Sinal campaign, the believes that it is only the knowledge that larsel "can defeat all the Arab arrise put together" that has restrained the Soviets from giving all-out backing to the Arabs. In New York, several hundred members of the National Executive Council of the Zionist Organization of America assembled from all parts of the U.S. in an all-day meeting to urge all American Zionists to participate in the Tenth Anniversary celebrations to be held throughout the country, and rededicate themselves to help safeguard Israel's security and economic development.

Dr. Emanuel Neumann, addressing the meeting, socused the U.S. Government of attempting to whitewash Abdul Nasser in order to "rehabilitate the Egyptian dictator in the free world's opinion." He cited the presumed readiness of the Government to "settle for considerably less than a clear-cut break with the Soviets and a new pro-Western orientation on Nasser's part."

It was announced that 10,000 American Zionists are expected to visit Israel during the current year.

Confer on USSR **'Wedge' Tactic**

The state of the s Covernments would agree to have one Ambassador speak for all three countries. If Russia's demand for separate talks leads to a stalemate, it is thought the Soviet Union may suggest bringing Peland and Cacchoslovakis into the preliminary talks to pair of against Britain and France. Another obstacle is Russia's insistence that the Ambassadors a hould confine themselves to technical arrangements for a summit meeting. Chodorov Out Of Team for Tokyo

TELL AVIV, Sunday. — Ya's acov Chodorov, the "Hero of Cardiff" and for 12 years goalkeeper of the national team, is not to be included in the Israel eleven which is to play in the Asian games in Tokyo at the end of May. The decision, was taken by Aluf-Mishne Shmuel Socher, selector of the national side, after Chodorov's failure to turn up for several training periods with the 20 other "Possibles" for the team.

A'M Socher told The Jerusalem Post tonight that Chodorov was apparently busy with things other than football, and did not find the time to appear for training with the Possibles or with his club. Tel Aviv Hapoel. "Chodorov is in poor condition, and the basis of his present form does not deserve to be included in the Israel team," he said.

It is learned that Chodorov has taken a partnership in a new sports goods shop.

HAIFA, Sunday. — Fertilizers and Chemicals has begun production of triple superphosphates, the Company announced today.

This type of fertilizer contains a concentration of 42-46 per cent phosphoric acid, as compared with 16-18 per cent in ordinary superphosphate and 22-24 per cent in ordinary superphosphate and 22-24 per cent in the enriched fertilizer.

The 'triple' variety has the advantage of providing the required amount of phosphorus, an essential plant nutrient, in concentrated form and at a substantial saving on packing materials, transport changes and labour.

A young man spokesman for the demonstrators, told The Jerusalem Post that they wanted to move to be near their relatives. In addition, "doctors told us that the climate at Nevatim is unsuitable for us and most of the children are usually ill," he said.

The immigrants arrived in Israel over three years ago. The families at Nevatim who remained at home and did not come to Jerusalem did not have relatives in the corridor though their stand was "not yet clear," he said.

The demonstrators left for home during the afternoon, leaving behind four representatives, who were promised an answer this morning by Agency Settlement Department officials.

The Yugoslavia is following the content of the Yugoslavia is following the content of the Yugoslavia is followed by cranks of every persuasion, but transformed by the content of the past years not to hurt the feelings of their Moscow friends. Nevertheless the conviction that their road was the right one must have become too clearly apparent in some at least of the resolutions submitted for approval to the Congress of the Yugoslav Communists. Quite a few of these resolutions submitted for approval to the Congress of the Yugoslav Communists. Quite a few of these resolutions touch sing on international as well as home policies have been criticized by Moscow. It is easy to understand why Marshall Tiots opposition to any military bloc must have displeased the Soviets.

The emphasis placed by Yugoslav Communists on the Workers' Councils denoted the transformation of the Morkers' Councils accepted the fact of the part from some considerable improvements to the Workers' Councils accepted the past from some considerable improvements to have real power in the management of industrial plants, and rasolutions presented to the Congress have have head unfortunate extending the proposal to the management of industrial plants, and rasolutions presented to the Congress have head unfortunate extending the proposal to the pro either willingly or reluc-tantly, accepted the fact that Yugoslavia is follow-ing her own road to so-cialism; but they cannot

management of industrian plants, and resolutions presented to the Congress have stressed this point. But the Soviet leaders have had unfortunate experiences with workers' councils, which played so important a role in the Budapest revolt. Only a few days ago, Mr. Gomulka himself had to curtail the powers of the Polish Workers' Councils drastically, and to put them under the strict control of the Communist Party. Polish Workers' Councils had actually defended the idea that strikes are letimate even in a socialist state, something that rurus counter to the whole Soviet attitude.

In all countries of the eastern bloc in which workers' councils exist, the tendency is today to suppress these or at least to reduce their power. One can understand, therefore, that the leaders of the eastern bloc regimes could not easily go to Yugoslavia and by their presence appear to give approval to conceptions which they consider a great danger.

It is still too early to

It is still too early to say whether the rift between Belgrade and Moseow will provoke an intensification of the Cold War. It looks as if the two countries may try to maintain normal inter-state relations, if not inter-party ones.

But there is no doubt that the need to re-enforce the solidarity of the "Socialist camp" may push "Socialist camp" may push the Soviet leaders into measures against Yugo-alevia that will to some
